Remarks on Course of Study.

The Elementary course consists of the first and second years of the Normal Course as above shown.

The Advanced Course comprehends four years, and includes all the work prescribed in both sections of the tabulated course.

To complete either course, a student must pass a satisfactory final examination on each subject prescribed therein. He must pursue in class all professional subjects, and take the required amount of Practice and Criticism.

Students completing the Elementary Course receive the Regents' Certificate, which is a State Certificate, good for two years from date of issue.

Students completing the Advanced Course receive the Normal Diploma, with the degree of *Bachelor of Scientific Didactics.*

This Diploma is a State Certificate of highest grade.

Students are admitted to any term or year on examination, except that professional subjects must be taken in course as stated above.

This course is designed for such students as have completed the requisite amount of academic study in other institutions, and are fully prepared to enter at once upon professional training. Candidates for admission will be examined with this view, and if their scholastic attainments prove satisfactory will be admitted. The academic grades of successful candidates, if properly certified by the authorities granting them, will be accepted and recorded, but no grade will be credited at more than 90 per cent., except upon satisfactory evidence of superior scholarship.

The examination here referred to must not be confused with *entrance examination* mentioned under "Conditions of Admission."

Students completing the Elementary Section with its parallel course of reading, and passing the required examinations, will receive the Regents' Certificate now granted to regular graduates from the Elementary Course. This Certificate is a license to teach in any county of the state for a period of two years from date of issue.

To such as complete the entire course, and pass the required examinations, will be granted the Normal Diploma, with the Degree of *Bachelor of Scientific Didactics.*

The Normal Diploma is a State Certificate of highest grade.

The course comprehends one year's work. Applicants for admission will be expected to present satisfactory evidence of good moral character, and of graduation from an institution of approved grade. They will be required to pursue regularly in class all the studies of the above course, and to take such reviews as their qualifications may indicate to be needed.

☞ For program of this course see the subjects marked with a (*) in the daily program for each term.

Such graduates from the full course as teach successfully for three years after graduation and complete the above course of reading, or its equivalent, will receive the Post-Graduate's degree, *Master of Scientific Didactics.*

An examination of candidates for this degree will be held at the time of the regular Commencement Examinations each year. It will require an attendance of about one week. Further information as to books and authors will be furnished on application.

General Information.

OBJECT OF THE SCHOOL.

The school, as its name implies, is designed for the training of teachers. It offers superior advantages to young ladies and gentlemen seeking to qualify themselves for the profession of teaching.

Instruction in the various branches of study embraced in a good public school course is combined with careful study of methods, and actual training in the School of Practice. Special prominence is given to education as a science and as an art. School organization, class management, methods of recitation, and such other topics in school economy as are especially important to teachers, receive careful attention.

DAILY PROGRAM.

The daily program of recitation gives special prominence to the common school branches, without neglecting the more advanced studies of the course. As far as possible, review classes in History, Geography, English Grammar, and Arithmetic, are organized every term. In addition to this, regular instruction in the entire course is carried forward without interruption. By this arrangement the work is so distributed that teachers of all grades may enter at ANY time and find classes suited to their several needs. The best time to enter is at the opening of terms as indicated in the calendar. Students should come in time to be classed and ready for work before the first day of the term if possible.

PROMOTIONS.

Classes are frequently reorganized in order to afford suitable work for all, and students are promoted from one class to another as rapidly as their talent and effort permit. No one is required to continue a subject after having demonstrated his fitness for more advanced work, but students are expected to pursue the course regularly from the point at which their examination entitles them to enter.

SCHOOL OF PRACTICE.

This department is in charge of an experienced Superintendent, under whose direction the members of the graduating classes are required, in the actual work of teaching, to test the value of the theories, principles, and methods learned in the Normal Department. The student teacher is required to prepare and submit for criticism a complete plan of each lesson, clearly indicating every step in the work

of instruction. These plans are carefully criticised and returned in time for the embodiment of all suggested improvements in the instruction given to the class.

It is the duty of the Superintendent of the Practice Department to visit every recitation in that department daily, and at the close of the day to meet the teachers privately for advice and criticism. Once each week, practice teachers are called together, and the faults of the week are made the subject of a lecture on school management. The training is so conducted as to correct the mistakes of the student teacher, while allowing free scope for the exercise of individuality. In case of failure, the student is dropped from the roll of practice teachers, and sent back to the Normal classes for review and further study. By faithful use of the facilities offered by the school of practice, a student may gain in a few weeks a teaching power that would otherwise require months of experiment at the expense of the children taught and the waste of much valuable time. Each candidate for graduation is expected to teach forty minutes daily for five months. The good results of this training are already apparent in the increased efficiency of our graduates, and the better salaries paid them by school officers.

ADMISSION.

1. Applicants for admission to the Normal Department must be sixteen years of age.

2. Those seeking admission for the first time must present satisfactory evidence of GOOD MORAL CHARACTER. A letter from the County Commissioner, or from some person of well-known integrity, will be sufficient.

3. Those who come from other institutions of learning must submit satisfactory evidence of having been HONORABLY DISCHARGED.

4. Applicants must pass an examination in Spelling, Reading, Descriptive Geography, Elements of English Grammar, and Arithmetic as far as percentage. Teachers may be admitted to classification without examination on presenting a VALID CERTIFICATE of any grade.

This examination may be either written or oral, and is not intended to be exhaustive. The object is to obtain enough knowledge of the applicant's attainments to determine whether he is fit to enter, and, also, to enable the faculty to form a satisfactory classification. Students wishing to pass subjects will have special examinations for that purpose.

5. Candidates for advanced standing must pass all special examinations at the time of entering school. All subjects of the prescribed course not fully disposed of at that time must be taken regularly in class.

6. Reading, Geography, English Grammar, and Composition must be taken either as reviews or in the regular classes.

7. Attention is directed to the following extract from section 8131, of the Revised Statutes of 1889.

"Every applicant for admission shall undergo an examination in such manner as may be prescribed by the Board [of Regents], and they shall require the applicant to sign and file with the Secretary of the Board a declaration of intention to follow the business of teaching in the Public Schools of this State."

The above declaration is required in order that the energies of the school may be directed in the one channel of training teachers, and in no other. Applicants from OTHER STATES are admitted on the same terms as those from Missouri.

GRADUATION.

The course of study is subdivided into "Elementary" and "Advanced." Students who complete the elementary studies satisfactorily are granted a *Certificate of Graduation,* setting forth the studies completed, and the grade attained in each. The Normal diploma, with the degree of "*Bachelor of Scientific Didactics,*" is conferred upon those who complete the full course of four years.

The following are the conditions of graduation :

1. Candidates for graduation from the Elementary Course are required to attend at least five months ; those wishing to graduate from the full Course, one year.

2. They must possess good moral character, and satisfactory grades in deportment.

3. They must be at least sixteen years of age, if ladies, and seventeen, if gentlemen.

4. They must pursue regularly in class ALL the Professional studies of the course.

5. Students will not be admitted to class "C" as candidates for graduation UNTIL ALL SUBJECTS BELOW CLASS "D" are either completed or properly provided for. The tendency on the part of many to slight the lower studies of the course has made this requirement necessary.

6. All final examinations except in Course must be completed before the 1st of May. After that date members of the Faculty have their time fully employed with the regular work of the school.

CLASS HONORS.

The standard grade at graduation is 90 per cent. and the minimum grade allowed is 70 per cent., an average grade of 85 per cent. being required on the course completed.

Graduates whose average grade, including deportment, is 96 or above, are awarded First Honors. Those whose average grade lies between 93 and 96 are awarded Second Honors. Those whose average grade lies between 90 and 93 are awarded Third Honors.

EXPENSES.

The state makes no provision for the incidental expenses of the school, such as janitor's and engineer's salaries, fuel, libraries, apparatus, chemicals, improvement of grounds, and in order to provide for the great outlay necessary to meet these demands, an INCIDENTAL FEE of five dollars per quarter is charged. This fee is due at the opening of each term, and must be paid by the close of the first week. Money paid for incidentals will not be refunded.

NO STUDENT IS ENTITLED TO THE PRIVILEGES OF THE SCHOOL UNTIL THE INCIDENTAL FEE HAS BEEN PAID AND THE TICKET PRESENTED.

Board, including room, fuel and light, can be obtained in private families for $2.50 to $3.50 per week. Self-boarding, as practiced by many students, costs from $1.25 to $1.50 per week. Club boarding can be had at about the same rate.

A small number of ladies can be accommodated with furnished rooms in private families at fifty cents per week. Students availing themselves of this arrangement will be required to provide everything except furniture, mattress, heating stove and cooking stove.

Unfurnished rooms can be rented at prices ranging from $1.50 to $2.50 per month, depending upon the size, condition, and locality.

The entire expenses, exclusive of clothing, are about $40.00 per term of ten weeks. Students who board themselves can usually bring their expenses within $25.00 a term.

Further particulars will be furnished upon application.

As a means of reducing the expenses of students, the Regents have decided to place in the Normal Library, for rent, all the more expensive text-books used in the school. New books will be added as rapidly as the funds will permit.

DISCIPLINE.

Recognizing the truth that an institution for the training of teachers should be a model in discipline, as well as in all other respects, and that those who aspire to govern others should first learn to govern themselves, we endeavor to enforce strict discipline in every department of the school. Our aim is to secure this by appeals to the reason of the student; but, in case this means should fail to secure the desired end, the Faculty will not hesitate to enforce prompt obedience to all

requirements. We do not desire the attendance of those who are unwilling to conform cheerfully to the requirements of a well-ordered school.

The following Rules and Regulations have been adopted by the Board of Regents:

RULES AND REGULATIONS.

1. Students are required to be present at the morning exercises of the school, and to render satisfactory excuse for tardiness or absence.

2. Study hours in the Normal building commence at 8 o'clock A. M. and 1 o'clock P. M., and close at 12 o'clock M. and 4 o'clock P. M. Evening study hours extend from 6 o'clock to 9 o'clock P. M., during the first, second and third terms, and from 7 to 9 o'clock P. M., during the fourth term. During study hours all students are required to devote themselves strictly to study.

3. No student shall discontinue a study except for good cause, of which the President of the Faculty shall be the judge.

4. Students defacing or otherwise injuring school property will be required to make good the damage done, and may be subjected to discipline besides.

5. Students leaving school without being regularly excused by the President will be considered suspended.

6. Students are required to obey the Faculty; to conduct themselves orderly and discreetly; to abstain from all vicious, immoral or criminal conduct or practices; and are prohibited from visiting any saloon, gambling room or other place of an illegal or immoral character.

7. The Faculty are hereby invested with power to reprimand, suspend or expel any pupil who shall disobey any of the foregoing rules, or who shall be guilty of any contumacy, insubordination or immoral conduct.

8. In every case of suspension or expulsion, the President of the Faculty shall forthwith file with the Secretary of the Board of Regents a clear and concise statement in writing, naming the student, the date of suspension or expulsion, and, in case of suspension, for how long, together with the grounds thereof.

9. Any student, wishing to appeal from an order of suspension or expulsion, shall, within ten days from the date thereof, file with said Secretary a notice in writing to that effect, and thereupon said Secretary shall call a meeting of the Board of Regents for the earliest practicable date to pass upon such appeal. The Secretary shall also give notice to the student appealing, and to the President of the Faculty of the date of said meeting.

10. At the meeting of the Board of Regents so called as aforesaid the student appealing shall have an opportunity to make a defense, and shall be allowed to introduce testimony which, with the testimony offered by the Faculty, shall be heard and determined by the Board.

11. If a majority of the members of the Board present at such meeting shall vote to sustain the decision of the Faculty, the order of suspension or expulsion shall stand ; otherwise it shall be revoked and the student reinstated ; but in such case, the Board, if it finds that the student has been guilty of a violation of any of the rules, or of any contumacy, insubordination, or immoral conduct, may direct that such student shall be otherwise disciplined as to the Board shall seem meet and proper.

RULES FOR THE GOVERNMENT OF TEACHERS.

1. It is the duty of each teacher to co-operate with the President of the Faculty in carrying out all regulations for the welfare and discipline of the school.

2. It is the duty of teachers in charge of rooms to be at their respective school rooms at 8 o'clock A. M. and at 1 o'clock P. M. and to remain during school hours. Any teacher not at his or her school room as specified shall report the fact to the President with reasons therefor.

3. It is the duty of each teacher, who intends to resign during the yearly session of the school, to give written notice of the same to the President of the Faculty, at least two weeks before the taking effect of such resignation.

4. It is the duty of the President of the school to report to the Board of Regents any teacher who neglects or refuses to perform the duties assigned. The Board of Regents shall consider all complaints, and act upon them according to section 8130 of the Revised Statutes of Missouri.

ADVANTAGES.

Warrensburg is located in one of the healthiest sections of the State, and the moral influences of the place are fully equal to those of any other town of its size in the West.

The school possesses an excellent working outfit, among which may be named the following :

LIBRARIES.

Students have the use of good Libraries of Reference and General Literature free. These have been largely increased during the past year.

A Text-book Library is maintained from which students may rent books at small cost.

CABINETS.

The Geological and Botanical Cabinets are well arranged, and rapidly increasing in number and range of specimens. These afford great assistance to the student in getting a clear knowledge of the subjects to which they relate.

LABORATORY.

The school also possesses a fine Chemical Laboratory, equipped for individual work, and well supplied with the apparatus and other requisites of successful chemical drill.

To this may be added a good selection of Physical Apparatus, Mathematical Forms and Solids, Globes, Charts, French Weights and Measures, Drawing Models, etc.

CORRESPONDENCE.
